

The logo

A QR code inside a magnifier, forming a Q. The tagline lockup is the default; drop it when the logo appears smaller than one inch, or when the tagline already appears in the surrounding copy.

PRIMARY LOCKUP

WITHOUT TAGLINE

REVERSED ON INK

ON BRAND

ONE-COLOR INK

ONE-COLOR WHITE

THE Q ALONE — APP ICON, FAVICON, AVATAR

The green-tile icon is the App Store and Play Store submission. Ink is the alternate for dark-themed placements. The Q never appears alongside the full lockup in the same composition.

Placement

CLEAR SPACE

Clear space

Half the height of the Q on every side. Nothing crosses it — not type, not imagery, not the edge of the artboard.

Minimum size

Q alone: 24 px on screen, 0.375 in in print. Full lockup: 96 px wide on screen, 1 in in print. Below that the QR modules fill in.

Over photographs

Use the one-color white lockup over a scrim or a dark area of the image. Never the two-color version.

Backgrounds

Paper, white, Linen, Ink or Brand. Not Amber, not a mid-tone neutral, and not a second green.

NEVER

Rotate or tilt

Stretch or condense

Place on Amber or any accent

Add shadows, glows or strokes

Light mode

Eleven tokens carry every light-mode screen. Mark Green belongs to the logo and nothing else — the interface green is Brand, which is darker so that white text on it clears 4.5:1.

	TOKEN	HEX	WHERE IT GOES
	Mark Green	#6FB63A	Logo only — never a UI surface or a button
	Brand	#4A8524	Primary buttons, links, active states
	Brand Hover	#3F711F	Hover and pressed states
	Brand Deep	#2F5C15	Brand-colored text and icons on light surfaces
	Brand Tint	#F1F8EA	Selected rows, badges, empty states
	Amber	#E4A03C	Illustration and category art only — never a button
	Paper	#FAF8F5	Page background
	Linen	#EDE9E2	Cards, chips, table rows
	Line	#CFC8BC	Borders and dividers
	Muted	#8B8377	Secondary text, placeholders, disabled
	Ink	#211E1A	Primary text, admin sidebar

Contrast

White on Brand is 4.7:1. Brand on Paper is 4.6:1. Brand as a text color on any surface lighter than Linen must step down to Brand Deep. Muted is for secondary text at 14 px and above only — never for body copy.

Dark mode & status

Dark mode is not an inversion. Neutrals stay warm, and the green lifts to Brand on Dark so it holds contrast against Surface.

DARK MODE

	Surface	#1A1815	App background
	Elevated	#2B2823	Cards and chips
	Brand on Dark	#7FC94A	Primary actions — lifted for contrast
	Text on Dark	#F5F2EC	Primary text
	Muted on Dark	#8F887C	Secondary text

STATUS

	Success	#4A8524	Shares Brand — a second green would not read
	Warning	#C8860E	On hold, action needed
	Error	#C2452C	Failed print, rejected file
	Info	#35708F	Neutral notices, work in progress

FIVE RULES

- 01 Brand is the only color that means "tap this." Amber is decoration; it never becomes a button.
- 02 Photos lead. Chrome is Paper, Linen and Ink — color shows up in buttons, active states and status pills only.
- 03 Two surfaces per mode. Paper over Linen in light, Surface over Elevated in dark. There is no third card level.
- 04 Success reuses Brand. In-progress states carry Info blue instead, so two greens never sit side by side.
- 05 Mark Green is the logo's green and stops there. Interface green is always Brand or darker.

Outfit

Geometric with near-circular bowls, close to the letterforms already in the wordmark. Free on Google Fonts, so it ships in the apps and the web build without a licence. Four weights, no italics.

STYLE	SIZE / LINE	WEIGHT	SAMPLE
Display	40 / 44	600 Semibold	Designed tonight
Heading 1	30 / 36	600 Semibold	Your projects
Heading 2	20 / 26	600 Semibold	Order QR-4821
Body	15 / 24	400 Regular	Upload your photos and lay out a card.
Body strong	15 / 24	500 Medium	Ready for pickup Friday
Label	13 / 18	600 Semibold	Send to lab
Caption	12 / 16	500 Medium	5×7 folded · 2 up

Spacing

Multiples of 4. Radius 10 px on controls, 14 px on cards, 99 px on pills.

Fallback stack

Outfit, system-ui, sans-serif

Minimum

Never below 12 px on screen. Tap targets 44 px on mobile.

In use

The same nineteen tokens across all three surfaces. Grey blocks stand in for customer photographs.

MOBILE APP

Brand appears three times on the home screen: the active filter pill, the primary button, and the selected tab. Everything else is Paper, Linen and Ink so the thumbnails carry the page.

In dark mode the button flips to Brand on Dark with Ink-green text, since white on the lifted green fails contrast.
